

October 27, 1958

Dr. Harry Eagle
National Microbiological Institute
N.I.H.
Bethesda 14, Maryland

Dear Harry:

I would be much obliged to you if you could send me some of the details about Dr. Hertzberg that we discussed during our meeting in Bethesda. I recall that you made some comment about the remarks that Jacques had made concerning Hertzberg's personality characteristics and I would be especially grateful if you could indicate in some more detail what the problems seemed to be here and how you have managed in this respect.

It was an inspiration to see what you have been doing and I enjoyed myself tremendously during my visit. I'm not planning to be in the Washington area for nearly a year as far as I can tell now but will try to look you up at the next opportunity. Meantime, as you know, we are planning to move to Stanford about February 1 and as we will be there for at least a couple of months I hope you look us up if you are out on the coast.

As ever,

Joshua Lederberg

JL/jp
